## For release:

September 2011

### **Danfoss Turbocor honored with Governor's Business Diversification Green-to-Gold Award**

Tallahassee, Fla. - Danfoss Turbocor Compressors Inc. received the 2011 **Governor's Business Diversification Award in the Green-to-Gold Major Market category** at a September 14 reception at the Governor's Mansion.

The award, given by Enterprise Florida in conjunction with Florida's Annual Industry Appreciation Week, recognizes organizations in Florida that best exemplify "green" leadership and investments in economic development.

**In making their selections, Enterprise Florida considered each organization's commitment to investing in the community and efforts to improve and diversify Florida's economy.**

Danfoss Turbocor was chosen due to significant high wage job growth, considerable contributions to the local economy, and commitment to energy savings and sustainability.

Contributing factors in **Danfoss Turbocor's** selection included:

- Addition of 50 new staff positions in the past year
- Annual average growth of 20%
- \$14 million in purchases through local and regional suppliers

"We are very honored to receive this award and it's very important for us to be recognized in the state of Florida," said Ricardo Schneider, president of **Danfoss Turbocor**. "It is a true testament to our ongoing commitment to the community and to sustainable energy **efficiency.**"

**About Danfoss Turbocor Compressors:**

*In a world of finite energy resources, environmental focus, and converging technologies, Danfoss Turbocor's mission is to redefine lifetime operating costs for commercial HVAC systems. As the originator and global leader of the oil-free, magnetic bearing centrifugal compressor product category, the company is dedicated to the design, manufacture, marketing and support of the world's most efficient commercial refrigerant compressors. Combining industrially proven component technologies largely sourced from the aerospace industry, Danfoss Turbocor compressors promise new horizons in energy efficiency and lifetime operating costs for mid-range chiller and rooftop HVAC applications. The company has been recognized for awards by many prestigious organizations including the USA EPA, AHR/ASHRAE USA, Natural Resources Canada and the Institute of Refrigeration – England.*
